Date: July 9th, 2018

Subject: Budget for FY July 01, 2018 to June 30, 2019

The staff of the New River Valley Regional Jail, in conjunction with the New River Valley Regional Jail Authority Finance Committee, is pleased to present our operating budget for fiscal year July 01, 2018 to June 30, 2019.

The budget was developed in accordance to the guidelines provided in the Authority Agreement dated February 28, 1995, as amended, and the 1997, 2008, and 2016 Bond Issue Master Indenture.

This balanced budget was approved by unanimous vote at the New River Valley Regional Jail Authority meeting held on May 11, 2018.

The FY 2018/2019 Operating budget for the New River Valley Regional Jail Authority is based on an average daily inmate population of <u>890</u> local and state responsible inmates. The cost per inmate day (per-diem) will stay level at \$27.50 for FY 2018/2019. Actual daily use, multiplied by the per diem provides the basis for our members' annual cost to house an inmate at the Regional Jail.

Revenue funds were allocated as part of either the Service Agreement or Master Indenture to maintain the reserve accounts of the New River Valley Regional Jail which are identified below:

Operating Reserve – Section 5.3 of the Authority's Service Agreement requires the Authority to provide an Operating Reserve in each of its Annual Budgets in an amount that is equal to 25% of its projected Annual Budget for each year, less debt service (current requirement is approximately \$4.5 million).

Debt Service Reserve - The funding of a Debt Service Reserve is addressed in both Section 5.3 of the Service Agreement and Section 7.5 of the Master Indenture. These funds are sized equal to the lesser of maximum annual debt service, 10% of the principal amount of the bonds or 125% of average annual debt service. The current funding level is approximately \$3.6 million. This fiscal year, we are reviewing the

potential of altering the investment of our debt service reserve in order to increase our interest earnings.

Repair and Replacement Reserve – Established in Section 7.6(b) of the Master Indenture is funded in an amount determined by the Authority based upon projections of future capital needs. The Repair and Replacement Reserve must be maintained at a minimum balance of \$100,000. Once again, this year's budget provides additional funding of \$100,000.00 of repair and replacement reserve funding.

#### **Budget highlights for FY 2018/2019**

Repair and Replacement Reserve – Established in Section 7.6(b) of the Master Indenture is funded in an amount determined by the Authority based upon projections of future capital needs. The Repair and Replacement Reserve must be maintained at a minimum balance of \$100,000. Once again, this year's budget provides additional funding of \$150,00.00 of repair and replacement reserve funding in addition to any residual revenues at the end of the fiscal year.

#### Budget highlights for FY 2019/2020

The FY 2019/2020 Operating budget is based primarily on the operational needs of the facility for the next fiscal year.

#### Revenue Summary:

**	Charges for Services as a percentage of total revenue (per	41%
	diems):	
***	Intergovernmental revenue as a percentage of total	56%
	revenue:	
•	Miscellaneous, recovered costs, interest:	3%

#### Notable items with regard to FY 2019/2020 revenue projections include:

- \* An increase in per diems collected from some member jurisdictions from the previous budget year due to a reduction in the prisoner population forecast.
- Use of Vacancy Saving funds from the Compensation Board's Permanent Personnel and Equipment Expense funding to off-set budget expenses. In previous years, this has been shown in the budget as a separate revenue source. This year's budget consolidates that revenue in its proper position as State Compensation Board salary reimbursement. These funds will be used to off-set the cost for fuel, vehicle equipment and maintenance, police supplies and temporary personnel.
- \* We expect to receive \$180,000 from the Department of Corrections to cover medical costs incurred by state responsible inmates during the FY 2019/2020 budget.
- Additional revenue is expected in the form of cost recovery from prisoners.

#### **Expenditure Summary:**

**	Employee cost as a percentage of total expenditures:	64%
**	Debt service as a percentage of total expenditures:	17%
**	Building costs as a percentage of total expenditures:	5%
**	Inmate service costs as a percentage of total expenditures:	6%
*	Miscellaneous expenditures:	8%

#### Notable items with regard to FY 2019/2020 expenditure projections include:

- As a result of a significant increase to our current health insurance provider, we changed our health insurance provider, which reduced our cost to approximately a 5.5% increase over last year's cost.
- The Commonwealth authorized a 3% increase in salary for employees.
- **❖** Training costs increased in order to accommodate the training requirements of the Compensation Board's Career Development Program (Master Jail Officer).
- The most significant contribution to the increase in projected expenditures is a result of the removal of a large portion of Mental Health Services from the local Community Services Board as well as the increase of mandatory mental health services for prisoners.
- \* Budget increase to fund the cost of several capital improvement projects to include:
  - Kitchen equipment repairs
  - Security System Repairs and Replacement

- **❖** Repair and Replacement of HVAC equipment
- \* Roof repairs and other infrastructure repairs

Please be aware that our budget is contingent on inmate population meeting or exceeding this expectation based on historical data and current trends. According to the most recent forecast models, the population of state responsible prisoners is expected to rise by approximately 0.3% annually and adult local responsible inmates is expected to rise approximately 0.3% annually. Our population forecast was conservative, based upon our local trend analysis and the unpredictable population numbers statewide for the past three fiscal years ('16-'18). Failure to meet projected population trends may result in a mid-year per diem adjustment.

I wish to thank our Director of Finance, the members of the Finance Committee, the Treasurer, and all members of our staff for their continued support and assistance in the preparation of this document. Their financial experience, wisdom, and knowledge has proven to be invaluable.

The Administrative staff will evaluate the budget on a frequent basis. Any areas of concern will be brought to our members' attention without delay.

Sincerely

Gregory P. Winston Superintendent

#### FUND 5

## NEW RIVER VALLEY REGIONAL JAIL AUTHORITY DEBT SERVICES RESERVE ACCOUNT

To be held by the Trustee

#### DEBT SERVICE RESERVE ACCOUNT INSTRUCTIONS

The Debt Service Reserve Account will be used by the Trustee to make transfers to the Bond Account to the extent necessary to pay the principal of and interest on any series of Bonds which are secured by the Debt Service Reserve Account when due if the amounts on deposit in the Principal and Interest Sub-Accounts of the Bond Account and amounts transferred by the Authority from the General Reserve Account and from the Repair and Replacement Reserve Account are insufficient for such purpose. The Trustee will establish a separate sub-account in the Debt Service Reserve Account for each series of Bonds secured thereby, and the funds in each such sub-account shall be pledged solely to the series of Bonds for which it was established. In the event the amount on deposit in the Debt Service Reserve Account in the aggregate is less than the Debt Service Reserve for each series of Bonds secured thereby, the Authority will transfer funds from the General Reserve Account and from the Repair and Replacement Reserve Account to the Debt Service Reserve Account to restore the Debt Service Reserve Requirement in the manner provided in the Master Indenture. In the event funds transferred to the Debt Service Reserve Account are not sufficient to cure all of the deficits that may exist in the sub-accounts therein, such funds will be ratably distributed among such sub-accounts in which a deficit exists. Within five (5) days after each Principal Payment Date and Interest Payment Date and at such other times as the Authority may request, the Trustee will determine if the balance on deposit in the Debt Service Reserve Account is at least equal to the Debt Service Reserve Requirement for each series of Bonds so secured; if a deficit exists, the Trustee will immediately notify the Authority of the deficit. If the balance in the Debt Service Reserve Account is equal to the Debt Service Reserve Account Requirement, any interest received on, and profit realized from, the investment of money in the Debt Service

Reserve Account will be transferred to the Project Account during construction of the Project and thereafter to the Interest Sub-Account of the Bond Account, unless otherwise provided in any Supplemental Indenture.

In lieu of maintaining and depositing money or securities in the Debt Service Reserve Account, the Authority may deposit with the Trustee an irrevocable letter of credit, bond insurance policy or surety bond in an amount equal to all or a portion of the Debt Service Reserve Requirement for any such series of Bonds, provided the issuer of the letter of credit, bond insurance policy or surety bond, as appropriate, is rated in one (1) of the two (2) highest long-term debt rating categories by the Rating Agencies then rating such series of Bonds, without regard to any refinement or gradation of such rating category by numerical modifier or otherwise. Any letter of credit or bond insurance policy or surety bond will permit the Trustee to draw or obtain amounts under it for deposit in the Debt Service Reserve Account that, together with any money already on deposit in the Debt Service Reserve Account, are not less than the Debt Service Reserve Requirement for the series of Bonds secured by any such credit facility.

The Trustee will make a drawing on any letter of credit or obtain funds under the bond insurance policy before its expiration or termination (i) whenever money is required for the purposes for which Debt Service Reserve Account money may be applied; and (ii) unless the letter of credit, bond insurance policy or surety bond has been extended or a qualified replacement for it delivered to the Trustee, in the event the Authority has not deposited money in immediately-available funds equal to the Debt Service Reserve Requirement for the series of Bonds secured by any such credit facility at least two (2) business days preceding the expiration or termination of the letter of credit or bond insurance policy.

If the Authority provides the Trustee with a letter of credit, bond insurance policy or surety bond, the Trustee will transfer the corresponding amount of funds then in the Debt Service Reserve Account for the series of Bonds secured by any such credit facility to the Authority, provided the transfer of funds will not adversely affect the exclusion from gross income for purposes of federal income taxation of interest on the Bonds, and the Authority covenants to comply with any directions or restrictions contained in such opinion concerning the use of such funds.
